## Jeffco employee connections k12

Jefferson Academy is a public school chartered by the Jefferson County R-1 School District. JA serves approximately 1300 students in grades K-12 and employs more than 235 teachers, education support professionals and administrators. During its 2010 session, the Colorado General Assembly enacted the "Public School Financial Transparency Act" as part of House Bill 10-1036. Section 22-44-304 of the Colorado Revised Statutes states "Commencing July 1, 2010 and on a continuing basis thereafter, each local education provider shall post (financial) information on-line, in a downloadable format, for free public access. The Act defines "Local Education Providers" to include both school districts and charter schools. To meet the requirements of this Act, please click on the links below where we have posted the following items: Charter School Adopted Budget Including Uniform Budget Summary (current year and prior 2 years) Charter School Financial Audit (current year and prior 2 years) Salary Schedules (current year and prior 2 years)

Here's how your business can participate.Consider SWAP job seekers for positions in your companyProvide speakers for classroom experiencesProvide on the job training, job tours, job shadows, work experiencesOffer input into the kinds of skills job seekers need to be successful in the workplaceProvide opportunities for participants to learn about your business Fostering a Culture of Free and Independent Thinkers through Tradition and Innovation Addenbrooke Classical Academy is a tuition-free, public K-12 charter school located in Lakewood, Colorado. As an educational community, we are deeply committed to providing a quality education for our students and to upholding the responsibility that comes with teaching and learning. Mission Statement ACA utilizes an integrated model of tradition and innovation to develop free and independent thinkers through classical instructional strategies. A Snapshot of Addenbrooke Classical Academy A Liberal Arts Education Using a Classical Framework Trivium We practice the Trivium by incorporating teaching methods necessary for the grammar stage, the logic stage, and rhetoric stage, as well as the content traditionally found in each. Quadrivium We offer and study arithmetic, geometry, music, and astronomy to gain an understanding of the integral nature of the universe. Core Knowledge The Core Knowledge scope and sequence, developed by E.D. Hirsch, is taught in grades kindergarten through eighth grade. Charlotte Mason Principles Using the Charlotte Mason methods of nature study, the study of habits, art and music, living books, narration and dictation, we seek to spark curiosity in students and inspire them to discover the pleasure of learning for its own sake. Latin Beginning in fifth grade, and intensifying in grades seven and eight, all students study Latin. Besides its modern use in the medical and scientific fields, this study is invaluable in learning grammar, parts of speech, vocabulary, and increasing the ability to write well. The Good, True, and Beautiful Everything we study at Addenbrooke Classical Academy, math, literature, music, history, the sciences, languages, and art rests on the foundation of discerning that which is good, true, and beautiful. We believe that ability to discern is what separates us from beasts and is worthy of lifelong study. Phone: 719-542-0220 Website Grades served: 6-12 Authorized by: Pueblo County School District 70 301 28th Lane Pueblo, CO 81001 Authorizer Phone: 719-562-0468 Summary: View the 2019 School Performance Framework (PDF)View the 2019 Alternative Education Campus (AEC) School Performance Framework (PDF) Summary: Colorado Springs School District 11 Achieve Online school provides students in Colorado with a free academic program built around 21st century skills to prepare your child for the future. The Achieve Online learning program includes: an engaging web and text based curriculum aligned to local, state and national standards; Core courses include Language Arts, Math, Science, Social Studies, and Spanish; Enrichment opportunities consist of Art, Health, Music, and Physical Education Certified teachers; Low student to teacher ratio; Personalized learning through the use of diagnostic assessments, learning styles inventories, and individualized feedback; Opportunities for students and families to interact socially through optional school outings, field trips, and other social events; Student-parent-teacher communication via e-mail, online interactive grade book, telephone, and video conferencing; Parent and student support through free in-person learning sessions and training seminars at our learning lab. In general, we will offer the best of both worlds: a traditional model that is made up of trained educational staff and the innovative and flexible experience for students with a virtual learning model. Academically, we want students and parents to have physical teachers, instructional support staff, principals and assistant principals. A traditional educational hierarchy and job descriptions so that folks know who to go to when there is a question or concern. When a student or parent calls, we want that to be answered by the school and not "corporate". Additionally, we will couple this with an effective team of interventionists who will provide various support for students and families as needed. We want to be responsive and respectful as we work with families to meet their child's academic and social emotional needs. This allows all aspects of school to be where the students are versus only providing services from the brick and mortar building. We will be providing a free "Blended Learning" program. Each student will be provided with a laptop computer so they can access our award winning online curriculum provided by Edgenity and social emotional curriculum that is supported by certified and licensed teachers who will engage students in the curriculum and guide them in a well rounded educational experience. The administration team and teachers will also team up with a task force of interventionists, who will help coach the student to academic success and provide social emotional support. Academy of Las Animas will provide hands-on learning opportunities in science, math, making and engineering at Drop in Zones and in communities through designated Learning Pods for remote online learning. Students who reside in the same geographical area will be given opportunities to come into nearby drop-in zone centers. For students who don't reside by one of our drop-in zones there are virtual drop-in zones as well as the formation of Learning pods will be created and made up of students in a certain geographical region and activities will take place in public areas such as parks, libraries etc. This gives students the chance for hands-on learning and social opportunities to interact with fellow online students. Students at our school will be offered several different pathways to success. From a more traditional high school Diploma experience, to Concurrent Enrollment in college course, to specialized training in CTE courses and finally a credit recovery program which caters to students who are overage and under credited with a program which will catch them up, still provide them with a high school diploma as well as workforce readiness certificate. At the Academy of Las Animas online we provide a personalized experience, with dedicated teachers who prepare students for success in life.
